Introduction:

- ▶ Creating a PowerPoint presentation here is not possible, but I can guide you on how you might structure it. Here's a suggested outline for your presentation on a budget tracking app developed using the Flutter framework and utilizing the Sqflite database:

- ▶ **Title Slide:**

- Title: Budget Tracking App Using Flutter & Sqflite
- Subtitle: A Comprehensive Solution for Personal Finance Management

- ▶ **Introduction:**

- Brief overview of personal finance management.
- Importance of budget tracking apps in modern-day financial planning.
- Introduction to the Flutter framework and Sqflite database.

Objective:

- Define the goals and objectives of the budget tracking app.
- Highlight the features and functionalities it aims to offer.

Features of the Budget Tracking App:

1. User Authentication:

1. Secure login and registration process for users.
2. Protection of personal financial data.

2. Dashboard Overview:

1. Visual representation of financial data.
2. Summary of income, expenses, and savings.

3. Expense Tracking:

1. Record and categorize expenses.
2. Add notes and tags for better organization.

4. Income Management:

1. Track various sources of income.
2. Set recurring income transactions.

Features of the Budget Tracking App:

1. Budget Creation and Management:

1. Set monthly budgets for different categories.
2. Receive notifications for budget limits.

2. Reports and Analytics:

1. Generate detailed reports and visual analytics.
2. Identify spending patterns and trends.

3. Customization Options:

1. Personalize categories, tags, and labels.
2. Set currency preferences.

4. Sync Across Devices:

1. Ensure seamless access to financial data across multiple devices.
2. Synchronize data securely.

Technology Stack:

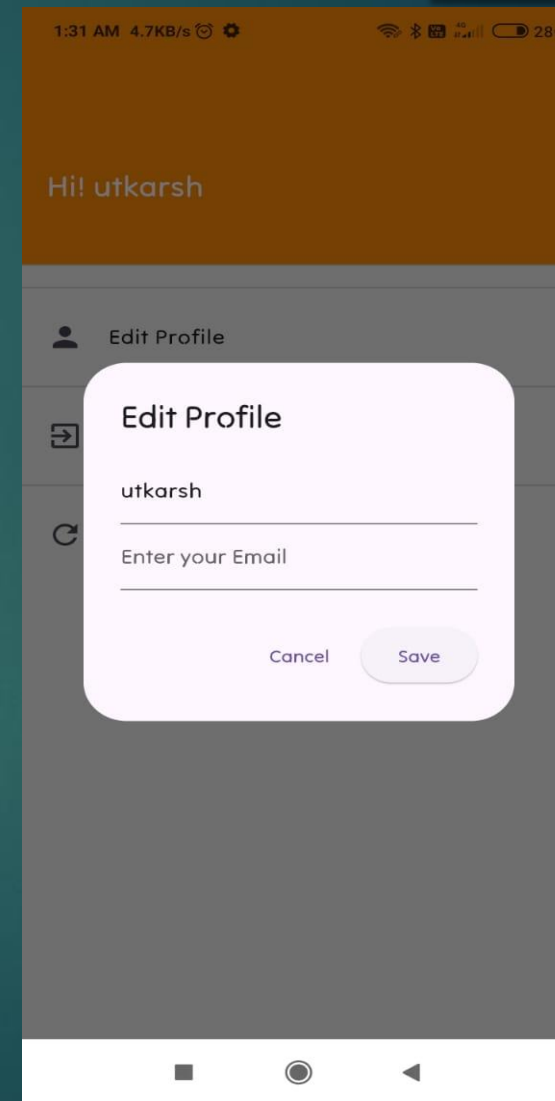

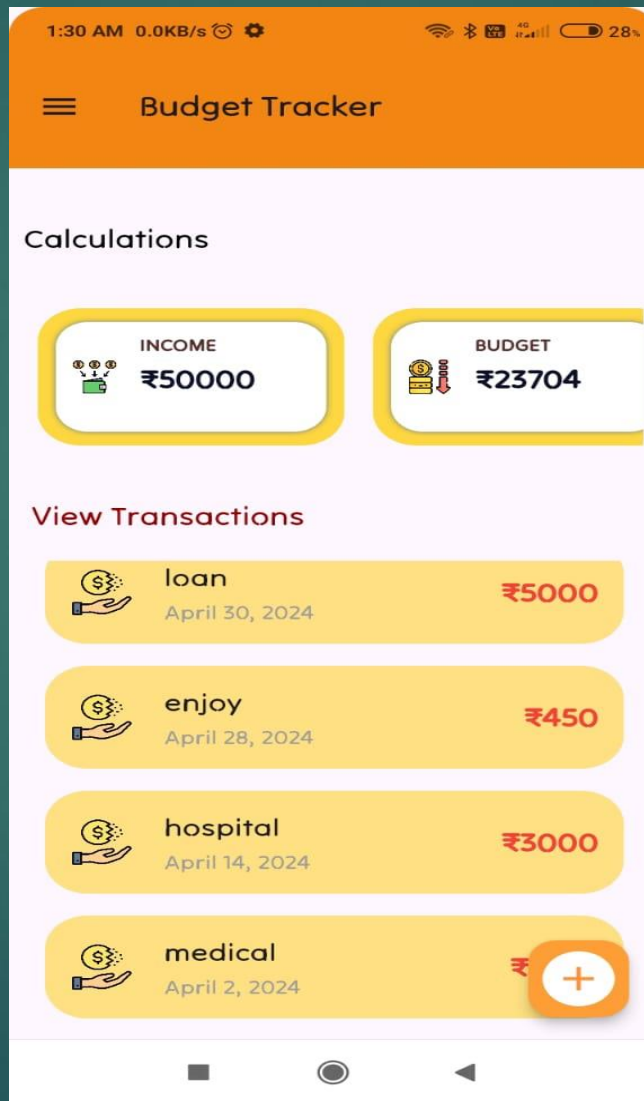

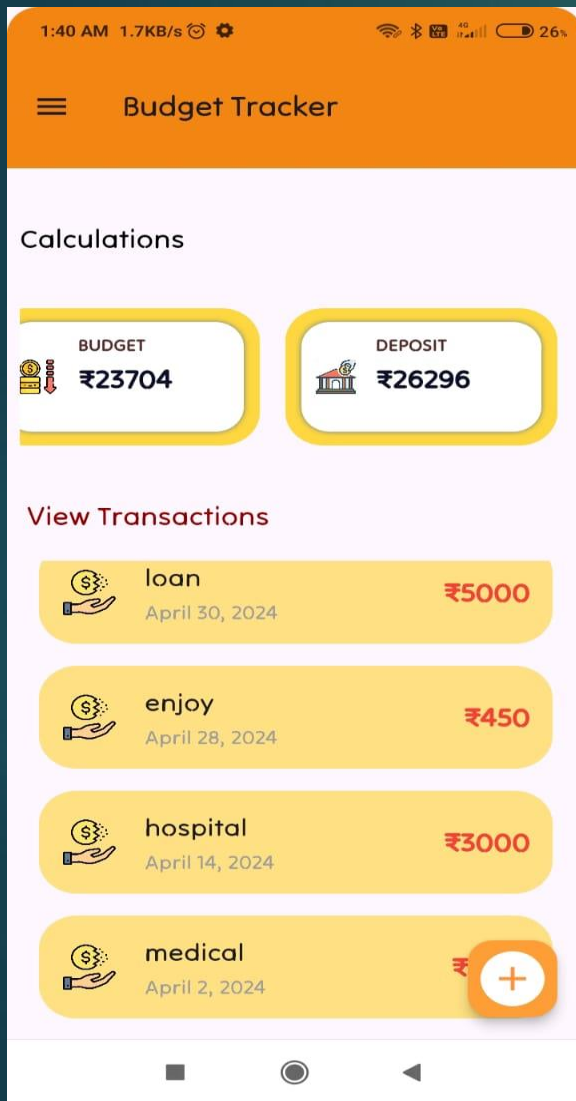

- Overview of Flutter framework for cross-platform app development.
- Introduction to Sqflite database for local storage and data management.

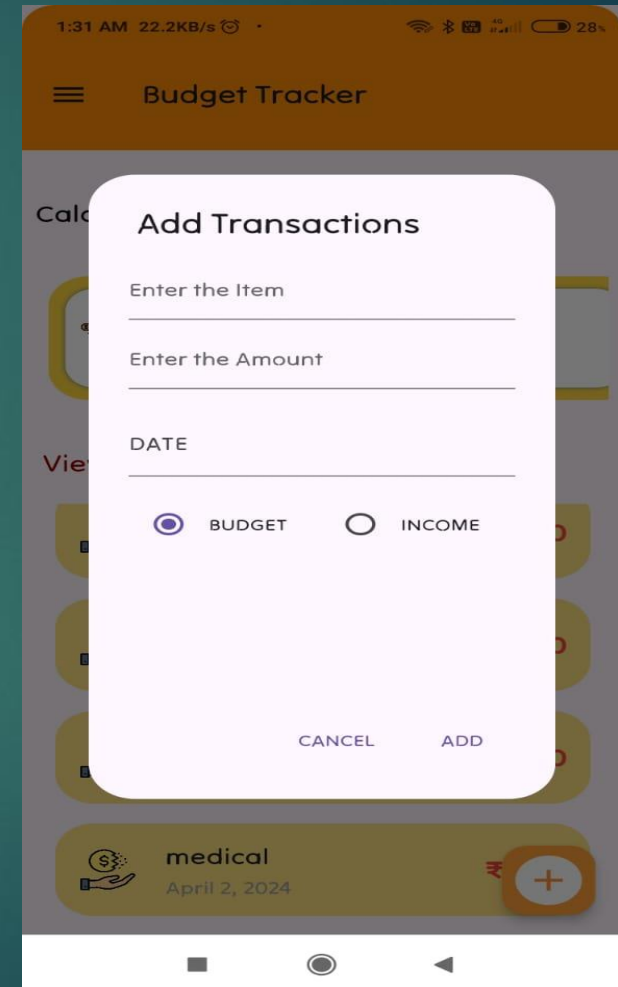

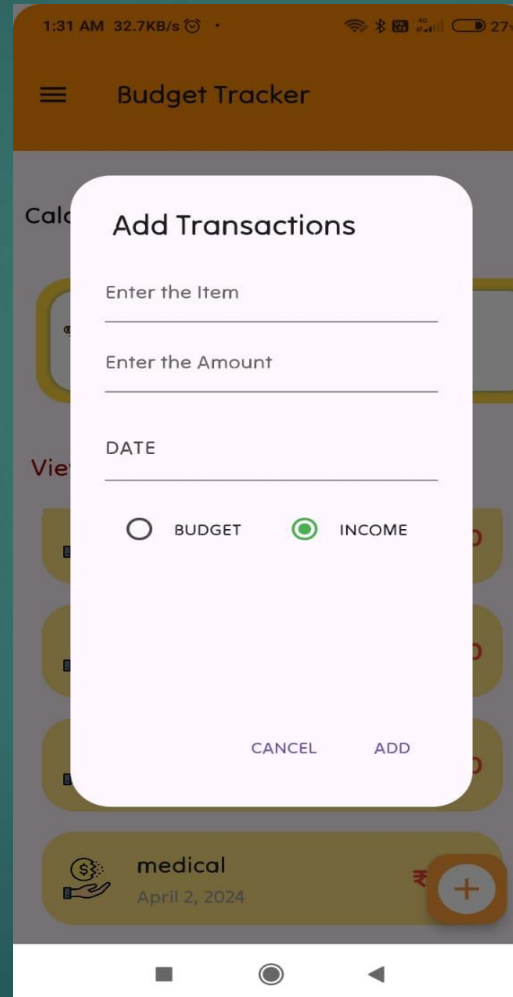

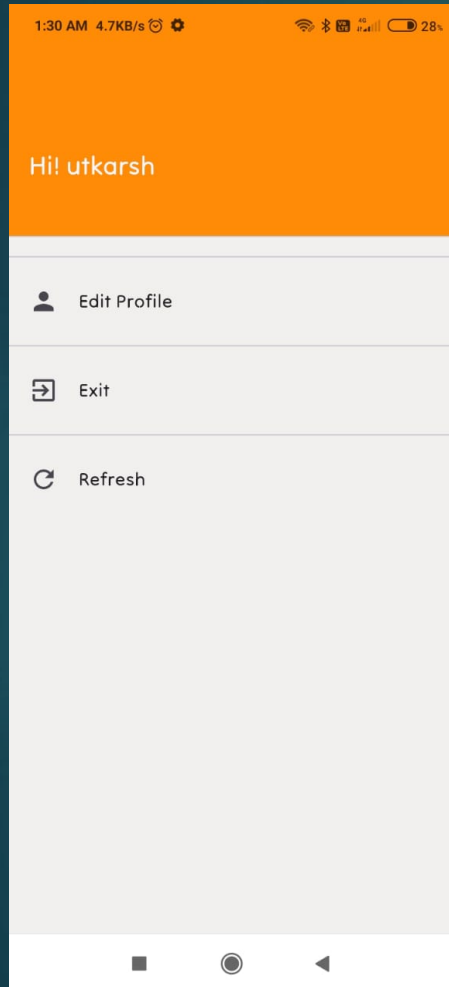

Database Schema:

- Explanation of the database structure using Sqflite.
- Tables for users, expenses, income, categories, etc.

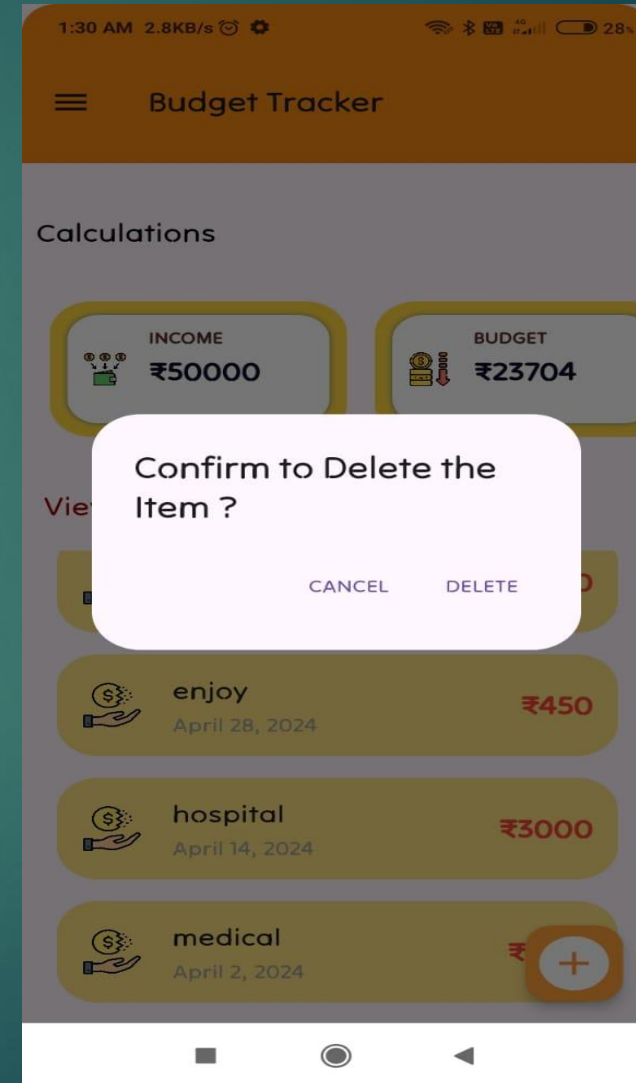

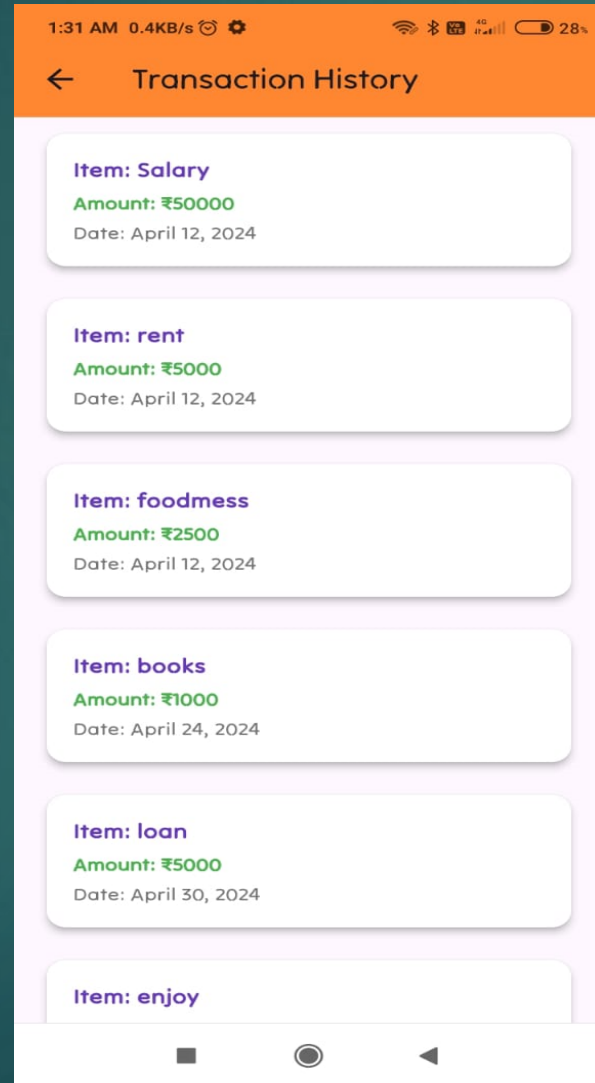

Results:

Results:

Results

Conclusion:

- Summary of the presentation.
- Reiteration of the app's significance in personal finance management.

Thank you....
